Independently Published, United States, 2019. Paperback. Condition: New. Language: English. Brand new Book. My Inventions Nikola Tesla's Autobiography At the age of 63 Tesla tells the story of his creative life. First published in 1919 in the Electrical Experimenter magazine Table of Contents I. My Early Life II. My First Efforts At Invention III. My Later Endeavors IV. The Discovery of the Tesla Coil and Transformer V. The Magnifying Transmitter VI. The Art of Telautomatics Nikola Tesla (Serbian Cyrillic: ?????? ?????; 10 July 1856 - 7 January 1943) was a Serbian American inventor, electrical engineer, mechanical engineer, and futurist best known for his contributions to the design of the modern alternating current (AC) electricity supply system. Tesla gained experience in telephony and electrical engineering before immigrating to the United States in 1884 to work for Thomas Edison in New York City. He soon struck out on his own with financial backers, setting up laboratories and companies to develop a range of electrical devices. His patented AC induction motor and transformer were licensed by George Westinghouse, who also hired Tesla for a short time as a consultant. His work in the formative years of electric power development was also involved in the corporate struggle between making alternating current or direct current the power transmission standard, referred to as the war of currents. Tesla went on to pursue his ideas of wireless lighting and electricity distribution in his high-voltage, high-frequency power experiments in New York and Colorado Springs and made early (1893) pronouncements on the possibility of wireless communication with his devices. He tried to put these ideas to practical use in his ill-fated attempt at intercontinental wireless transmission; his unfinished Wardenclyffe Tower project. In his lab he also conducted a range of experiments with mechanical oscillator/generators, electrical discharge tubes, and early X-ray imaging. He even built a wireless controlled boat which may have been the first such device ever...
